THE REGALE LILY

(L. MYRIOPHYLLUM)

THIS beautiful new lily comes from North-western China, which as a guarantee of its hardiness. The exquisite blending of tints and colors, forming a charming contrast with the rich green foliage, makes it one of the most beautiful of all known lilies.

Highly recommended for general culture.

The large trumpet-shaped, fragrant flowers are pure transparent white, with a distinct, rich canary-yellow throat and orange stamens. The buds and outside of petals are delicate pink, which is often reflected through the petals.

Plants grow from three to four feet tall. In the garden it should bloom early in July, continuing its glorious display well into August. Mature bulbs will produce five to ten flowers, and are fine for house decoration, lasting for days after being cut.

BULB CULTURE

Bulbs can be planted in the Fall or Spring. (If planted in the Fall it is well to mulch a little for first winter, but do not use fresh barnyard manure for mulching.) It will do well in any good, rich, well-drained garden land, either partly shady or all sun.

This lily will not thrive in a location where water occasionally stands or in a tight mucky soil.

SEED CULTURE

TO GROW THE REGALE LILY FROM SEED

Sow in Greenhouse or Hot Beds, in January, in well pulverized, light sandy soil. Care must be exercised in watering as young seedlings have a tendency to damp off. Dusting with Formaldehyde dust from time to time will prevent damping. About the same culture as given tomato seed will get good results with Regale Seed. Seedlings should be lined out of doors in beds as soon as the weather permits, in good garden loam well drained. Plant about one inch deep and keep well cultivated during the summer season. Either dig in the fall and transplant back in three or four weeks, or if your soil is strong enough, you may leave out the seedlings for two years, mulching after the leaves die down, with about two or three inches of well prepared compost.

For out door culture sow seed about April 1st in drills, about 50 seeds to the foot and one-half inch deep. Keep well cultivated.
